11. Appendix entitled "Teacher's professional standard" to the Order No. 133 of the Chairman of the Board of the National Chamber of Entrepreneurs of the Republic of Kazakhstan "Atameken" dated June 8, 2017

## DEFINITIONS AND ABBREVIATIONS

**European qualification framework (EQF)** is an eight-level structure that compares national qualifications and describes the qualitative superiority of one qualification over another, each described in terms of knowledge, competence and skills.

**National qualification framework** consists of eight qualification levels, which corresponds to the European qualification framework and the levels of education defined by the Law "On Education" of the Republic of Kazakhstan dated July 27, 2007. It defines the sectoral qualification framework of the NQF, a single representative of the qualification levels of general professional competencies for the development of professional standards.

**Descriptors** – description of the levels and scope of knowledge, skills, abilities and competencies that students acquire after completing the educational programs of the appropriate level (stage) of higher and postgraduate education

**Competences** – the ability of students to apply in practice the knowledge, skills and abilities acquired during the learning process in professional activities.

**Basic (key) competence** is considered to be found in all specialists, regardless of the specifics of the field, because competence is the basis of a specialist's qualification

**Learning outcomes** are the actual expected and measurable achievements of students and graduates, expressed in the language of knowledge, skills, abilities, competencies and describing what graduates can do by completing all or part of the educational program.

6B – Bachelor 's degree

EP – Educational program

University - higher educational institution

UC - university component

GBD - General Basic Disciplines

RC- Required component

BC- Basic components

CC - Component on choice

PC - profiling component

## INTRODUCTION

The educational program is developed in accordance with the Law on Education of the Republic of Kazakhstan, the European Qualifications Framework and the National Qualifications Framework, the Dublin Descriptors and the State Compulsory Standard for Higher Education.

The educational program is aimed at implementing the mission, policy and strategic plan of the University, such as providing educational services to train competitive professionals who can meet the needs of society&business and developing the relationship between education, science and practice to improve the social situation, innovation potential of the southern region.

Learning outcomes were determined based on the levels of Dublin descriptors and demonstrated through competencies. Special competencies were determined in accordance with the requirements of the state standard of compulsory education of the Republic of Kazakhstan, taking into account the social needs of employers, faculty, graduates and society.

The methods of teaching and assessment in the educational program are based on the final results of training in accordance with the ideology of the competence direction.

The structure and content of educational programs are fully harmonized. Educational programs are updated according to the needs of employers.

**1. LEARNING OUTCOMES AND CONTENT OF THE EDUCATIONAL PROGRAM**

**1.1. Competencies and expected results in the educational program**

Key competencies	Competences	Expected results
Educational	C 1. APPLICATION OF KNOWLEDGE	LO 1 To have the competence to understand the goals and objectives of psychological and pedagogical education.
		LO 2 Comprehensive approach to the performance of their duties, mastering the culture of thinking, self-development.
	C 2. APPLICATION OF INFORMATION AND COMMUNICATION TECHNOLOGIES	LO 3 Mastering the system of knowledge that defines their pedagogical activity, pedagogical relations and certain psychological consciousness and ideas, the formation of a system of psychological, pedagogical, methodological knowledge and skills.
Personal	C 3 SELF-DEVELOPMENT	LO 4 Formation of the relationship between the development and education of the individual, the acquisition of psychological literacy, the development of self-education.
		LO 5 Mastering the methods of identifying, analyzing, monitoring the results and experiments of optimal, effective methods of teaching psychology.

LO 9 LO 10 LO 12 LO 13
Psychological services in educational institutions	Psychological services help to ensure the development of the individual, correct various difficulties in the development of the child, stop the failure to achieve success in school. Helps children with intellectual disabilities by facilitating their social learning and social adaptation. Educates citizens who choose a profession according to their flexibility and abilities in the living environment and contribute to the development of society.		LO 9 LO 10 LO 12 LO 13
Methods of scientific psychological research	The main content of psychological services is to help ensure the development of the person, to correct various difficulties in the development of the person, to address issues of professional orientation. The main issue in the education system is to educate the younger generation, to focus on the formation of moral qualities.		LO 9 LO 10 LO 12 LO 13
TPPD 2218 Pedagogical and psychological diagnosis of personality	To carry out theoretical and practical training of future teachers and psychologists, to teach them to use modern psychological and pedagogical methods aimed at the formation and development of personality. Mastering scientific activities aimed at studying topical issues in the science of pedagogy and psychology, the formation of practical training and professional skills.		LO 9 LO 10 LO 12 LO 13
Psychodiagnostics of personality	Mastering the methods of diagnosing the psychological readiness of the child for school, consideration of ways of psychological and pedagogical research of		LO 9 LO 10

	the student, consideration of ethical and professional issues of psychodiagnostics. The use of information technology in the formation of a new generation of teachers to implement the issues considered in the theoretical works.		LO 12 LO 13
Methods of personality research	Mastering the structure of psychodiagnostic work, the correct organization and functioning of psycho-correctional work, as well as ways of psychological impact to overcome interpersonal conflicts. Formation of competencies in ways of further development of professional skills and abilities.		LO 9 LO 10 LO 12 LO 13
EP 3222 Experimental psychology	To acquire the necessary knowledge and skills for psychologists to provide psychological counseling for pedagogical tasks and various actions in different social systems during psychological correction, the use of psychodiagnostics of the individual, the formation of knowledge about research and its structure.		LO 3 LO 8 LO 9 LO 13
Diagnosis of mental disorders.	In order to organize the pedagogical and psychological process aimed at the formation and development of personality, to teach pedagogical psychological diagnostics using standardized guidelines, to process the initial results teaches future pedagogical psychologists to make special diagnoses.		LO 3 LO 8 LO 9 LO 13
Applied psychology	Psychologists study cognitive, emotional, and social processes and behaviors by observing, interpreting, and writing about how people relate to each other and to their environment. They analyze the relationship between behavior and physical disorders, helping to improve their outcomes processes and behaviors, and monitor behavioral prevention to prevent various diseases and improve mental well-being.		LO 3 LO 8 LO 9 LO 13
APTUA 3223 Methods of organizing socio-psychological trainings	Psychological assistance to the life, work and social activities of the individual. Provide practical psychological assistance to public, private or scientific institutions to find effective solutions to psychological problems. Conducting psychological literacy activities. continuous improvement of self-psychological knowledge and experience of self-therapy in order to improve professional skills and professionalism.		LO 3 LO 5 LO 13
Special psychology	Knowledge of the basics of research and application of theoretical knowledge in the study of psychology and the application of theoretical knowledge in		LO 3 LO 5

	everyday life, analysis and search ways; analysis and evaluation of the results of psychological research and experiments.		LO 13
Areas of psychological services	Knowledge of the basic psychological concepts and patterns of development of processes. To master the features of the development of psychological knowledge, to learn to analyze and synthesize the laws of phenomena and processes in psychology, to learn to follow the rules and ethics of the psychologist.		LO 3 LO 5 LO 13
PKShE 1212 Professionalism and ethics of a psychologist	Development of the level of knowledge of future professionals and the formation of a high level of a set of behavioral norms governing human relationships, linking the theoretical and practical aspects of the professional skills and ethics of the psychologist.		LO 8 LO 9 LO 10 LO 13
Professional competence of a psychologist	To educate with a broad understanding of the concept of professional competence of a psychologist, to master the diagnostic tasks at a high level to provide advice on issues arising in the educational process and to form the ability to communicate in a social environment.		LO 8 LO 9 LO 10 LO 13
The personality of a psychologist	To develop the worldview of future teachers and to prepare their theoretical knowledge for practical skills, forming the skills of systematic observation of their professional activity and the image of a modern teacher.		LO 8 LO 9 LO 10 LO 13
AN 3225 Basics of art therapy	Increasing the activity of the individual to express their inner mood, using the creative potential. Perseverance in therapy helps the client to increase his personal creative activity in accordance with his abilities, directs him to create his own work. Application of finished works of art to the therapeutic effect through analysis and interpretation by the patient.		LO 9 LO 10 LO 12 LO 13
Psychology of children with disabilities	Forms the relationship and unity of teaching and education in the process of correcting the shortcomings of mental and physical development of children with special educational needs, using special methodological approaches. Along with the requirements, it teaches the child to respect his personality. Uses correctional lessons based on the child's individual characteristics, the observed factors, the positive aspects of the individual, as well as the observance of		LO 9 LO 10 LO 12 LO 13

	pedagogical norms of work and rest.		
Psychoprophylaxis	Trends in the prevalence of mental illness, personal frustration, anxiety, stress, the formation of various suicides, interpersonal conflicts, addictions (drug addiction, alcoholism, drug addiction, gambling, etc.). To provide future professionals with theoretical knowledge of communication psychology and the ability to apply practical skills and abilities in practice.		LO 9 LO 10 LO 12 LO 13
ZSP 3224 Zoopsychology and comparative psychology	Studies the ways of development in ontogenesis and phylogeny, their patterns and manifestations in terms of evolutionary development. Studies the comparative aspects of human psyche and animal mental activity, the structure of animal behavior and ecological characteristics of the species under study, perceptual processes, focused research reactions, memory, emotions, skills and other forms of learning based on objective analysis.		LO 3 LO 9 LO 10
Innovative competence of a psychologist	Teaches how to master pedagogical diagnostics changes in the education system or its design, certain functions and properties of the innovation process, including goals, structure, objectives, technologies and human resources, designing individual work based on the results of pedagogical diagnostics, establish communication communication between teachers and individuals, constantly arouse interest and develop accordingly.		LO 3 LO 9 LO 10
Psychology of leadership relationships	As a result of socio-pedagogical work, leadership develops potential and increases activity. Teaches you to make the right decisions quickly. Forms knowledge of the solution of specific problems, the development of public power, political culture and activism of the masses, the timely observation of new growth, the formation of management in other spheres of society, mass management to support them.		LO 3 LO 9 LO 10
EP 4227 Occupational psychology	Occupational psychology is a branch of psychological science that studies the formation and recognition of the laws of mental activity of man in the process of labor, and forms the psychology of human activities, based on the scientific basis of labor. To study the features of occupational psychology in different occupations, the formation of work skills, the impact of industrial and occupational conditions on the person, the location of tools, the necessary aspects of communication systems.		LO 9 LO 10 LO 13

Psychology of law	Formation of the student's knowledge in the field of clinical psychology, as well as methods of diagnosis and correction of various disorders, the impact of various psychological factors on the individual, the causes of personality disorders, prevention of neurological and psychological disorders and general psychology.		LO 9 LO 10 LO 13
Engineering psychology	Achieving a high level of intellectual activity is considered to be the expected result in the formation of search orientation by learning to understand new things, to feel the lack of knowledge, and in turn, to master the social, legal, moral, psychological aspects of modern teachers, requiring the formation of an individual who has certain competencies in teaching, education and upbringing of students.		LO 9 LO 10 LO 13
PedOA 3301 Methods of teaching pedagogy	To help future teachers-psychologists to master modern pedagogical technologies in teaching pedagogy and implement them in practice, forming the pedagogical and practical competencies necessary for the implementation of pedagogical activities in secondary vocational education.		LO 9 LO 10 LO 12
PsiOA 3302 Methods of teaching psychology	To be able to independently and effectively choose the tools, materials and methods needed to teach psychological knowledge in accordance with the various forms of teaching, to develop skills and abilities to use it, as well as to evaluate their teaching activities. Use of psychological knowledge as a tool for self-knowledge and self-development.		LO 9 LO 10 LO 12
P 4303 Pathopsychology	Pathopsychology teaches methods of experimental mental research for the purpose of conducting mental examination in comparison with the laws of mental activity and personality disorders, the laws of the formation and implementation of mental processes in the norm.		LO 9 LO 10 LO 12
PP(F) 1(2,3)04 Pedagogical practice (without interval) - 8 weeks	Formation of the need for continuous professional development of the student, feeling the subject of the whole pedagogical process, mastering the professionalism and skills of the psychologist in the formation of the image of the future teacher psychologist, which allows to implement the whole pedagogical process in a competent way		LO 3 LO 8 LO 9 LO 13
MPP 4305 Pedagogical (internship) / pre-graduation	Improving general pedagogical and general psychological knowledge, business skills for the formation and diagnosis of the student's personality and the state of the whole pedagogical and psychological process of the school.		LO 3 LO 10 LO 12

practice			
TP 4306 Experimental psychology	Practical methods are practical activities aimed at mastering the knowledge, skills and abilities of students. Students learn not only to hear, but also to see, to perform various cognitive activities, and to learn active teaching methods based on the theory of mind formation. Mastering this system improves the quality of mental activity and the formation of scientific dialectical thinking.		LO 3 LO 5 LO 9 LO 12
Empirical methods	To take into account that the understanding of the general laws of professional and pedagogical activity is possible only through an in-depth relationship with the object of question and answer, understanding its individual-motivational, cognitive and operational components. To teach many professionals the ability to summarize and identify the patterns of development of trends and phenomena through questioning.		LO 3 LO 5 LO 9 LO 12
Psychology of trade and business	Formation of the necessary knowledge and practical skills in the planning and organization of pedagogical research, considering the requirements and rules, importance and structure of the organization of the work of trade psychology.		LO 3 LO 5 LO 9 LO 12
KPGD 4307 Development of psychological science in Kazakhstan	Formation of the basis of social, historical, scientific and theoretical development of psychological science in Kazakhstan by forming a system of knowledge about the current state and formation of psychological science in Kazakhstan and deepening the psychological training of students. Development of students' scientific outlook through the process of formation of psychological science in Kazakhstan at different times.		LO 4 LO 10 LO 12 LO 13
Folk psychology	Formation of scientific and theoretical views and development of concepts on the basic psychological concepts of future professionals. Independent use of knowledge acquired in the course of educational and cognitive activities, the application of psychological knowledge in future practical activities.		LO 4 LO 10 LO 12 LO 13
Psychology of Proto-Kazakh tribes	To equip students with the basics of theoretical knowledge on main directions of modern psychology and to conduct self-analysis, search for sources of information for teaching the psychology of Proto-Kazakh tribes, forming important professional qualities of future teachers of pedagogy and psychology in the teaching of psychology.		LO 4 LO 10 LO 12 LO 13

TKKP 4308 Psychology of interpersonal communication	Psychology of interpersonal relationships is the formation of interpersonal culture with an in-depth study of the interaction of the individual with other people, interpersonal relationships within the group, social factors. It reveals the social and psychological aspects of the individual and forms a person as a conscious owner of action and a member of society.		LO 1 LO 2 LO 4
Kazakh psychology	Mastering psychological methods to fully understand the discipline, acquainting students with current issues in the history of psychology, research methods and methodological issues, the formation of a system of scientific knowledge about the the disciple and its structure. Mastering materials of world and domestic history, philosophy, fiction and biographical literature, art in the course.		LO 1 LO 2 LO 4
Methods of scientific psychological research	To study the mental development of the child to identify the <u>basic patterns and features</u> of his <u>mental</u> development and to identify effective ways to further improve the process of education and upbringing of the child in school and family on the basis of a comprehensive study. To study the existence of commonalities, peculiarities and individual qualities in each person as an individual and to be guided by the principle of organizational analysis and generalization.		LO 1 LO 2 LO 4
	<b>Additional education module (Minor) 1</b>		
UP 3309 Organizational psychology	To support the regime of organized systems, ensuring the observance of certain structures, to implement their activities, to understand their programs and goals. The presence of team members, the application of psychological theories and research methods to management and business issues, consciously and jointly achieving certain important goals for the public. Recruitment, staff motivation, staff training and development, formation of organizational behavior.		LO 3 LO 4 LO 11 LO 13
Cognitive psychology	The main task of cognitive psychology is to study the changes in sensory information from the moment the stimulus reaches the receptor surface until the response. Cognitive psychology is the study of areas of research in psychology that explain human behavior on the basis of knowledge and study the processes and dynamics of the formation of that knowledge. ### 3. Evaluation of learning outcomes

F-19-06/10

#### 3.1. Criteria for evaluating learning outcomes

Levels	Criterias				
	90-100 (A; A-)	70-89 (B+; B; B-;C+)	50-69 (C;C-; D+; D-)	FX(25-49)	F (0-24)
<b>Know</b>	shows that the student remembers the learned learning materials and retells them.	the student is not able to fully show that he has memorized the mastered learning materials.	shows that the student has a limited memory of the mastered learning materials.	shows that the student has a very small amount of memorized learning materials.	shows that the student did not remember the mastered learning materials at all.
<b>Understanding</b>	shows that the student fully understands the learning materials.	shows that the student has a small understanding of the learning materials.	provides information on the student's limited / partial understanding of the learning materials.	the student does not fully understand the learning materials.	the student does not understand the learning materials at all.
<b>Application</b>	fully understands the educational material and demonstrates its use in new situations.	shows that with the understanding of the study material can not fully use it in new situations.	shows that with limited / incomplete understanding of the study material can not fully use it in new situations.	with limited understanding of the study material, it is impossible to fully use it in new situations.	shows that the learning material can not be used at all in new situations.
<b>Analysis</b>	can fully reflect the analysis of the study material / task (distinguishes the main ideas, metaphors, analyzes the system component, etc.)	Demonstrates the ability to analyze the learning material / task with minimal errors (distinguishes the main ideas, metaphors, analyzes the system component, etc.)	Demonstrates limited / partial analysis of the study material / task (distinguishes the main ideas, metaphors, analyzes the system component, etc.)	shows that he / she is not able to fully analyze the study material / task (distinguishes the main ideas, metaphors, analyzes the system component, etc.)	shows that he / she cannot analyze the study material / task at all.
<b>Evaluation</b>	study material / task in relation to the given criteria, own criteria, etc. shows a complete assessment.	study material / task in relation to the given criteria, own criteria, etc. shows that it can evaluate with minimal errors.	study material / task in relation to the given criteria, own criteria, etc. can be limited / partially evaluated.	study material / task in relation to the given criteria, own criteria, etc. shows that they cannot fully evaluate	study material / task in relation to the given criteria, own criteria, etc. shows that they cannot evaluate at all.
<b>Assembly</b>	fully demonstrates the development of a solution plan (new content, model, structure, etc.) for the study material / task.	demonstrates the ability to create a solution plan (new content, model, structure, etc.) in the performance of the training material / task with a few errors.	indicates that the training material / task development plan (new content, model, structure, etc.) is limited / partial.	shows that the study material / task can not fully develop a solution plan (new content, model, structure, etc.).	shows that he / she is not able to develop a solution plan for the study material / task at all.

### 3.2. General rules for evaluating learning outcomes

1. The final results of the competencies to be mastered during the teaching of each subject (module) are regularly monitored and evaluated by the subject teacher throughout the semester. To do this, the head of the department, subject coordinator / teacher takes the following preliminary measures:

1.1 Depending on the goals and objectives of the discipline, the forms of teaching, the final results of training and the specifics of the competencies to be mastered, the elements of the teacher and the student, teaching methods and forms of current control are selected and reflected in the syllabus.

1.2 Taking into account the importance of the selected forms of control in relation to the subject, 100 points for the semester are divided into forms of control (not necessarily divided equally), specified in the syllabus of the subject.

1.3 The number of repetitions of each form of control during the semester (daily, weekly, 1, 2 or 3 times a semester, etc.) is determined and the points of the form are distributed evenly, indicated in the syllabus of the subject.

2.1 Students' compliance with the requirements of the control forms is organized throughout the semester and the results are evaluated in a timely manner.

2.2 The value of the individual control obtained may not exceed the points specified in Article 1.3 and shall necessarily be the corresponding part of the maximum score depending on the level of work performed / mastered.

2.3 The results of control on disciplines are discussed weekly with the student, twice a semester at a meeting of the department and the educational and methodical council of the faculty, and measures are taken to improve the quality of education.

2.4 At the end of the semester, the student's total score on all forms of control in the subject is determined and a decision is made on admission or non-admission to the intermediate certification in accordance with the requirements of the University "Rules of organization and conduct of intermediate certification."

2.5 Educational achievements of students (knowledge, skills, abilities and competencies) on a 100-point scale corresponding to the alphabetical system with the digital equivalent accepted in international practice and grades in the traditional system (positive grades by decreasing from "A" to "D" and "unsatisfactory" - "FX", "F").

2.6 In the case of "unsatisfactory" grade corresponding to the mark "FX", the student has the opportunity to retake the final control without having to repeat the program of the subject / module.

2.7 In case of "unsatisfactory" grade corresponding to the mark "F", the student re-enrolls in this subject / module, participates in all types of classes, performs all types of educational work in accordance with the program and retakes the final control. [Order # 563 of the Minister of Education and Science of the Republic of Kazakhstan dated October 12, 2018 "On approval of the rules of organization of the educational process on credit technology of education".

2.8 The current control over the progress of students, the procedure for their intermediate and final certification is established by the university in accordance with its academic policy and Annex 1 to this Regulation on the traditional scale of assessment of student achievement and ECTS (score).

2.9 Learning achievements of students in languages (foreign languages, Kazakh, Russian) are assessed on a point-rating alphabetical system in accordance with the level model of assessment and the scale of traditional grades ECTS. The level of language proficiency corresponds to the pan-European competence of foreign language proficiency (A1, A2, B1, B2, C1, C2).

2.10 The student is expelled from the university in the following cases:

- 1) academic failure;
- 2) for violation of the principles of academic integrity;
- 3) for violation of the rules of internal order and the charter of the university;
- 4) for violation of the terms of the contract for the provision of educational services, including non-payment of tuition fees on a paid basis;
- 5) voluntarily.

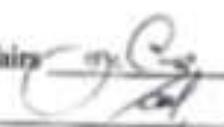

2.11 During the inter-student certification it is allowed to retake the exam on the subject (module) no more than twice.

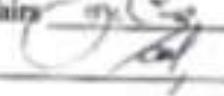

The third time a student receives an FX or F grade that corresponds to an "unsatisfactory" grade, the student is expelled from the university, regardless of how "unsatisfactory" grade he or she received, and loses the opportunity to re-enroll in the subject. In this case, the student at his own discretion moves to another university and (or) another educational program. At the discretion of the student, in addition to the cycle of general education subjects, the student moves to another educational program that does not contain the content of the subject, which received an "unsatisfactory" grade. A student expelled from the university is given a transcript signed and sealed by the first head of the university. The transcript must contain all grades obtained by the student in all subjects and (or) the final control (examination), including FX or F grades, which correspond to the grade "unsatisfactory". [On approval of standard rules of activity of educational organizations of the appropriate type. Order #595 of the Minister of Education and Science of the Republic of Kazakhstan dated October 30, 2018.
